HELLO GLAD FANS:-

It is indeed a pleasure to send you our 1949 catalog of Gladiolus Bulbs which feature a variety of fine Gladiolus. At this time we wish to again thank our customers of the season just past for their many orders and letters of thanks for stock received. May we continue to please you with satisfied purchases for years to come.

Our aim is to please every customer whether order is large or small for we know there is no advertisement more important to any business than a satisfied customer. Each and every order is given the same consideration and attention, whether it is a new customer or one who has purchased from us for years.

We are not in the true sense of the word a commercial grower, but grow these bulbs chiefly to find a control for the various diseases affecting them. (call it a hobby, a craze, or anything you like; but we get just as much pride in growing a field of healthy stock as many of you get in winning a blue ribbon at the shows.)

The main factor in the superior quality of our bulbs has been cleanliness with no over-crowded conditions during the drying and storing period; what we believe to be ideal drying and storing methods for our particular climate. (no specific method can be used by everyone due to the varying climatic conditions in which you live.)

Our State Inspector has given us the rating of the cleanest and finest bulbs grown in the State of Wisconsin for the past several years and that can only be accomplished by many hours of particular labor. Yet with that honor bestowed upon us, we have NEVER claimed them to be 100% DISEASE FREE, (we know there is no bulb free of disease) WE only claim them to be DISEASE CONTROLLED.

Besides the particular labor involved in drying and storing of bulbs, all labor in the field is done by hand, planting, cultivating, weed pulling and digging, at which time bulbs not meeting our standard of health are discarded, not even brought in the drying shed. Time and space does not permit me to go into detail to describe our method of producing the superior quality in our stock, the special built storage shed, the daily turning of bulbs, the careful watching of humidity and temperature in storage, etc.

With all the work and expense involved in attaining the high standard in our stock, we cannot meet the prices of machine handled stock or the price competition being staged by many commercial growers. Always remember, IT'S NOT THE PRICE OF THE ARTICLE, BUT THE VALUE RECEIVED. You may be surprised what a whale of a difference a few cents make. Our only regret is that every prospective buyer cannot see our stock before making a purchase, however we do invite those within traveling distant to come in and see them personally before ordering. I can safely predict your order will be larger than anticipated.

We extend to the public a cordial invitation to visit us at any time, whether it be when flowers are in bloom, from the end of July until frost, at digging time, or when bulbs are in storage. We are located on U.S. Hwy 51 about 7 miles south of Stevens Point and about 4 blocks south of intersection of 51 & 54. It is the farm on the curve across the road from Roger's Garage & DX Service Station.

Our policy has always been to sell only bulbs grown in our field. We too, could have the privilege of listing many introductions on the market but we are not a JOBBER and feel we would rather raise all bulbs sold in our catalog. To purchase them immediately when introduced would be a big investment, for often within a few years the bottom is dropped out of the price if it does not sell well, and we would sit, holding the bag with a tremendous loss. We will however get them for increase to list, just as soon as prices are reasonably set and they remain in demand.

As to our introductions, they are released by the comments of our visitors to the field. We feel the remarks made by them warrants an introduction, for they are the people representing the Glad Fans, who would be interested. All are sold exclusively by us and we hope you too will find favor with them.

TERMS

No order accepted for less than \$3.00 unless you wish to pay your own postage and not later than April 15th. Send money with order, special delivery not necessary mail received twice a day.

Bulbs will be sent prepaid by Parcel Post when danger of frost is past and weather permits safe mailing. If you wish to pay your own postage, we will add bulbs to amount of mailing cost.

Orders from the southern states desiring the bulbs during December, January or February must amount to \$5.00 or more as bulbs must be shipped by Express, as we sometime have weather below zero during that time. More than one order to that amount can be sent, packed separately in one shipment to same city, if desired.

UNDER NO CONDITION will we substitute varieties without your permission. Should we be out of size of kind you ordered, we would like your permission to substitute in size. If we do not have variety ordered and you do not give a second choice, we will refund your money.

Our count has always been liberal and many extras have been included as our customers can well testify. All bulbs are STATE INSPECTED in field and in storage. Helpful suggestions will be sent along with each order on planting and care of bulbs. All orders will be acknowledged with a card immediately, and placed on file in order received.

I, personally, will make every effort to make each purchase completely satisfactory. If for any reason you are not satisfied with the order when you receive it, you may return the stock at my expense and I will guarantee to refund your money without any questions asked.

Signed,

Martin Steinpreis

OUR INTRODUCTIONS

LAVENDER DIAMOND(1949-Steinpreis) We introduce to you our 1949 selection in the Glad field, a beautiful deep lavender, much darker than Patricia, about the color of the dark flocking in Lavender Queen. The best description we can give is a lavender Max Reger. The darker lavender blotch on lower petal does not detract from its beauty, but enhances it with a pale yellow diamond placed in the blotch, from which its name was selected by the visitors to our field. The edge of the petals sometime appear flecked according to weather conditions when blossoms open. All in all, it was approved the best choice of the deep lavenders in the field. Every blossom of Lavender Diamond was sold this summer to Florist and visitors alike, which of course may be a prediction of it becoming immensely popular as a florist glad and cut flower trade.

It grows about 60 inches tall in field under good culture, 18 to 20 buds, 6 to 7 florets open 4 showing color and 4½ to 5 inch florets. Will bloom in 80 to 85 days, has good germination and a fair propagator of bulblets and produces giant bulblets. The foliage is short which permits a long cuttable spike.

Bulb any size \$6. 12 Bblts sold only with bulb, at \$6-Total \$12

KUBLAI KHAN(1948 Steinpreis)(Mid-season) The Sport of Sports, from the famous Genghis Khan, a color we've been waiting for. A true salmon color identical in every respect as Genghis Khan with exception of color, same strong heavily ruffled substance in the petals, heavy foliage and strong spike. 5 to 6 blooms open with 5 showing color and 6 inch florets or over. If you like Genghis Khan you'll like this more so, as color is softer and more pleasing to the eye. Bulbets will not be sold for 2 more years. It's a fair propagator and has good germination of bulblets. LARGE \$25.00 MEDIUM \$20.00

CHAVANTES(1948)(Steinpreis-Late Mid-season) A beautiful bright scarlet red with darker blotch in throat, a real exhibition formal 18 to 20 buds; 8 to 10 open with remaining buds showing color. Grows 60 inch tall with a 28 inch flowerhead and 4 to 5 inch florets. Will stand up well in hot sun and does not fade like most reds. Well liked by local florists for its formation, a double row of blooms well attached to spike. Good germination and fair propagator of bulblets.

Med. 1-\$3.50

Small 1-\$2.00

Bbts. 1-50¢

SILVER & GOLD(1947-Steinpreis)(Late) A glorified White Gold with a longer flowerhead and more buds. Where White Gold is an informal, Silver & Gold is a formal. The color is a silvery sheen cream with a deeper gold throat, 18 to 20 buds; 7 to 8 florets open with 6 showing color. 5 to 5½ inch florets and will grow about 60 inches tall with wide foliage. Fair amount of bulblets which germinate readily. As it blooms later than White Gold, there is room for both in same garden.

Large 1-\$5.00 Med. 1-\$3.50

Small 1-\$2.00

Bbts. 1-50¢

BRILLIANT LIGHT(1946-Stianpreis)(Early Mid-season) A beautiful orange salmon scarlet with a clear tone. A light yellow lip with a white line running through center of each petal ending near tip. 5 to 7 well attached blooms open with 5 showing color, 18 buds on a 26 inch flowerhead with 5½ inch florets. The color is very attractive and catches the eye of all visitors, it blends well with anything and will make a good florists variety.

Large 1-\$1.50 Med. 1-\$1.00

Small 1-65¢

Bbts. 2-30¢

ASPASIA(Pronounced AS-PA-SHE-A)(1945 Scheer)(Mid-season) An apple blossom pink with creamy throat and yellow lip similar to its sister seedling White Gold. Florets are wide open well attached to spike. 5 to 7 open with 5 showing color with 5 to 5½ inch blooms, good producer of bulbets and a great florist variety.

Large 1-\$1.50 Med. 1-1.00 Small 1-65¢ Bbts. 2-30¢

NANETTE(1945 Scheer)(Late Mid-season) A stunning glad with sheer beauty, the three upper petals are a delicate baby pink with the lower petals shading from a white throat to a delicate pink edge. 5 to 7 blooms open, 5 showing color on an 18 to 20 bud spike. A formal type, grows about 60 inches tall. A grand florist glad with florets close to stem making it a good shipper. Good germination and propagator of bbts.

Large 1-\$4.00 Med. 1-\$2.50 Small \$1.25 Bbts. 10-\$3.50

UNLABELED COLLECTION OF ASSORTED GLADS.

Large Bulbs.....\$7.00 per 100

Medium Bulbs.....\$4.50 per 100

25 bulbs may be had at the 100 rate.

These bulbs are a collection of varieties taken from the list in the catalog, no throw aways. You may have your choice in colors, specify whether you prefer dark or light colors or a variety of both.

Suggest you order early if you are interested as many orders have been received before catalogs were sent out and orders are on file from summer visitors, so we may be out of many before long. Orders are filed in order received.

To cut down the overhead due to rising prices and the high cost of living, we have had our catalogs mimeographed this year in order to continue giving you the same quality in our bulbs.
